TABLE OF CONTENTS

SOLUTIONS TO:

CHAPTER 1. ESSENTIAL PRELIMINARIES

1.1 The Language of Mathematics—Expressions versus Sentences 1
1.2 The Role of Variables 6
1.3 Sets and Set Notation 9
1.4 Mathematical Equivalence 11
1.5 Graphs 14

CHAPTER 2. FUNCTIONS

2.1 Functions and Function Notation 24
2.2 Graphs of Functions 31
2.3 Composite Functions 35
2.4 One-to-One Functions and Inverse Functions 37a
SAMPLE TEST, Chapters 1 and 2 40

CHAPTER 3. LIMITS AND CONTINUITY

3.1 Limits—The Idea 44
3.2 Limits—Making it Precise 48
3.3 Properties of Limits 54
3.4 Continuity 58
3.5 Indeterminate Forms 60
3.6 The Intermediate Value Theorem 64
3.7 The Max-Min Theorem 69
SAMPLE TEST, Chapter 3 74

CHAPTER 4. THE DERIVATIVE

4.1 Tangent Lines 77
4.2 The Derivative 81
4.3 Some Very Basic Differentiation Formulas 88
4.4 Instantaneous Rates of Change 95
4.5 The Chain Rule (Differentiating Composite Functions) 98
4.6 Differentiating Products and Quotients 103
4.7 Higher Order Derivatives 110
4.8 Implicit Differentiation 114
4.9 The Mean Value Theorem 119
SAMPLE TEST, Chapter 4 123

CHAPTER 5. USING THE INFORMATION GIVEN BY THE DERIVATIVE

5.1 Increasing and Decreasing Functions 126
5.2 Local Maxima and Minima—Critical Points 135
5.3 The Second Derivative—Inflection Points 141
5.4 Graphing Functions—Putting it All Together 147
5.5 More Graphing Techniques 151
5.6 Asymptotes—Checking Behavior at Infinity 155
SAMPLE TEST, Chapter 5 158

CHAPTER 6. ANTIDIFFERENTIATION

6.1 Antiderivatives 161
6.2 Some Basic Antidifferentiation Formulas 165
6.3 Analyzing a Falling Object 168
6.4 The Substitution Technique for Antidifferentiation 172
6.5 More on Substitution 177
6.6 Integration By Parts 181
SAMPLE TEST, Chapter 6 185

CHAPTER 7. THE DEFINITE INTEGRAL

7.1 Using Antiderivatives to Find Area 188
7.2 The Definite Integral 191
7.3 The Definite Integral as the Limit of Riemann Sums 195
7.4 The Substitution Technique applied to Definite Integrals 197
7.5 The Area Between Two Curves 199
7.6 Finding the Volume of a Solid of Revolution—Disks 203
7.7 Finding the Volume of a Solid of Revolution—Shells 205
SAMPLE TEST, Chapter 7 207
