## TABLE OF CONTENTS

| PREFACE   |     |
|---|-----|
| ACKNOWLEDGMENTS   |     |
| STUDY STRATEGIES for Students of Mathematics  |     |
| TABLE OF SYMBOLS  | V11 |
| CHAPTER 1. ESSENTIAL PRELIMINARIES  |     |
| 1.1 The Language of Mathematics—Expressions versus Sentences                                | . 1 |
| 1.2 The Role of Variables   | 12  |
| 1.3 Sets and Set Notation   | 22  |
| 1.4 Mathematical Equivalence  | 29  |
| 1.5 Graphs  | 39  |
| CHAPTER 2. FUNCTIONS  |     |
| 2.1 Functions and Function Notation   | 54  |
| 2.2 Graphs of Functions   |     |
| 2.3 Composite Functions   |     |
| 2.4 One-to-One Functions and Inverse Functions  |     |
| SAMPLE TEST, Chapters 1 and 2 $\dots \dots \dots \dots \dots \dots \dots \dots \dots \dots$ | 104 |
| CHAPTER 3. LIMITS AND CONTINUITY  |     |
| 3.1 Limits—The Idea   | 108 |
| 3.2 Limits—Making it Precise  | 120 |
| 3.3 Properties of Limits  | 133 |
| 3.4 Continuity  | 145 |
| 3.5 Indeterminate Forms   |     |
| 3.6 The Intermediate Value Theorem  | 160 |
| 3.7 The Max-Min Theorem   | 171 |
| SAMPLE TEST, Chapter 3  | 179 |
| CHAPTER 4. THE DERIVATIVE   |     |
| 4.1 Tangent Lines   | 182 |
| 4.2 The Derivative  | 193 |
| 4.3 Some Very Basic Differentiation Formulas  | 204 |
| 4.4 Instantaneous Rates of Change   | 220 |
| 4.5 The Chain Rule (Differentiating Composite Functions)                                    | 228 |
| 4.6 Differentiating Products and Quotients  | 239 |
| 4.7 Higher Order Derivatives  | 249 |
| 4.8 Implicit Differentiation (optional)   | 257 |
| 4.9 The Mean Value Theorem  |     |
| SAMPLE TEST, Chapter 4  | 273 |

| CHAPTER 5. USING THE INFORMATION GIVEN BY THE DERIVATIVE     |     |
|--|-----|
| 5.1 Increasing and Decreasing Functions                      | 276 |
| 5.2 Local Maxima and Minima—Critical Points                  | 286 |
| 5.3 The Second Derivative—Inflection Points                  | 299 |
| 5.4 Graphing Functions—Some Basic Techniques                 | 309 |
| 5.5 More Graphing Techniques                                 | 320 |
| 5.6 Asymptotes—Checking Behavior at Infinity                 | 330 |
| SAMPLE TEST, Chapter 5                                       | 339 |
| CHAPTER 6. ANTIDIFFERENTIATION                               |     |
| 6.1 Antiderivatives  | 342 |
| 6.2 Some Basic Antidifferentiation Formulas                  | 354 |
| 6.3 Analyzing a Falling Object (optional)                    | 362 |
| 6.4 The Substitution Technique for Antidifferentiation       | 376 |
| 6.5 More on Substitution                                     | 385 |
| 6.6 Integration By Parts                                     | 391 |
| SAMPLE TEST, Chapter 6                                       | 398 |
| CHAPTER 7. THE DEFINITE INTEGRAL                             |     |
| 7.1 Using Antiderivatives to Find Area                       | 401 |
| 7.2 The Definite Integral                                    | 408 |
| 7.3 The Definite Integral as the Limit of Riemann Sums       | 418 |
| 7.4 The Substitution Technique applied to Definite Integrals | 423 |
| 7.5 The Area Between Two Curves                              | 428 |
| 7.6 Finding the Volume of a Solid of Revolution—Disks        | 436 |
| 7.7 Finding the Volume of a Solid of Revolution—Shells       | 444 |
| SAMPLE TEST, Chapter 7                                       | 450 |
| SELECTED SOLUTIONS   | 453 |
| INDEX  | 487 |
